

REMARKS/ARGUMENTS

Applicants' Representative would like to thank Examiner Chang for the prompt attention paid to the present application upon granting of the Petition to Make Special and for the courteous and helpful discussion of this application on May 23, 2006. Applicants would like to thank Examiner Chang for the indication that upon entry of the present amendment, the case will be in condition for allowance.

Claims 1, 13-23, 51-55, and 74-79 are now active in this application, claims 2-12, 24-50, 56-73 having been cancelled. The claims have been amended to clarify that the present claimed compound is crystalline and is the monohydrochloric acid salt monohydrate. As noted by the Examiner, this amendment is supported by the specification and conforms the nomenclature to that used in the Chem. Registry for monohydrochloric acid salts and for monohydrates. The dependent claims have been amended to incorporate similar wording as needed. All amendments are supported by the claims and specification as originally filed. No new matter has been added by these amendments.

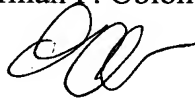

During the discussion of May 23, 2006, the Examiner indicated that claims 68-71 would be restricted out as drawn to a patentably distinct invention. The Examiner is requested to specify this in the Notice of Allowance for purposes of Applicants not being subject to a double patenting rejection in a subsequent Divisional application.

Application No. 10/532,104
Preliminary Amendment

Applicants submit that the application is now in condition for allowance, and early notification of such action is earnestly solicited.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
